

Alpenföhn®

Dolomit Advanced - High performance Single Tower with 180W TDP
 German engineering, an all-black heatsink combined with the multi-award winning Wing Boost 3 ARGB fans: The Dolomit Advanced offers enough spare performance to efficiently cool the most demanding systems.

High-end heat pipes & copper base plate

4 high-end heat pipes with a large contact area on the nickel-plated Copper base plate ensure good heat pick-up at the CPU. Therefore the heat can be conducted to the large area fin stack quickly and efficiently.

All-black design

The heat sink is completely black and the stylish top fin rounds the design off. Further are all mounting parts kept black too.

Asymmetrical heat sink

The asymmetrical design of the Dolomit heat sinks allows maximum freedom when choosing RAM modules. No matter how high the heat spreader of the module is, it will fit without any problems. 100% RAM compatibility on the sockets 1200, 115X und AM4.

Thermal grease

The Thermal Grizzly Hydronaut thermal paste with its excellent thermal conductivity can also be used in the overclocking market. Advantages: No hardening, silicone free and not electrically conductive.

Specifications

Dolomit Advanced

Part number	84000000184
Dimensions	120x73x154 mm
Weight	758 g (incl. fan)
Heatpipes	4 x 6 mm
Fins	Aluminium
Baseplate	Copper
Compatibility AMD	AM5, AM4
Compatibility Intel	1700 (UpgradeKit), 1200, 115X, 20XX
Thermal Grease	Thermal Grizzly Hydronaut

Specifications

Wing Boost 3 ARGB

Dimensions	120x120x25 mm
Rated Voltage	12 VDC
Voltage Range	7 - 13,2 VDC
Bearing	Hydraulic Bearing
Fan Connector	4-Pin PWM
LED Connector	3-Pin ARGB
LED Voltage	5 V
LED Rated Current	0,57 A
Airflow	92,6 m³/h
Speed	500 - 1600 RPM
Noise	23,5 dB(A)
Pressure	2,19 mm H2O
Rated Current	0,13 A
Input Power	1,56 W

Wing Boost 3 ARGB

With its 16.8 million colours, the Wing Boost 3 ARGB offers numerous possibilities to put your case into the right light. The addressable RGB LED lighting is integrated into the fan housing, put a light shine onto the impeller, and also shines stylishly to the outside.

Upgradable fan configuration

If even more performance is required, the kit contains four fan clips. This allows the mounting of an additional 120mm fan on the back of the heat sink, increasing the cooling performance even further.

German Engineering

A perfect balancing act between performance and compatibility was achieved through intelligent material selection and a new Rock Mount 3 mounting system.

Compatibility

The enclosed mounting material allows secure installation on the following sockets:
 Intel® LGA: 1700 (UpgradeKit), 1200, 1150, 1151, 1155, 1156, 2066, 2011-v3, 2011
 AMD: AM5, AM4
